

BULLETIN

NO.: 15- 111
DATE: July 14, 2015
TO: All Personnel
FROM: Kevin Ester, Deputy Chief, Logistics
SUBJECT: Quickstop Fire Sprinkler Tool

During the month of July, the Logistics' Division will be issuing Quickstop Fire Sprinkler Tools to every frontline engine and truck company. The Quickstop "Talon" is a one-size-fits-all tool for stopping the flow of water from sprinkler heads.

Please watch the assigned video in TargetSolutions for proper tool operation; additional reference material is located in the San Diego Fire-Rescue Drill Manual, Section III, Chapter 23, Salvage & Overhaul.

The addition of these tools to our inventory is made possible by a gracious donation to the San Diego Fire-Rescue Foundation from our own Engineer Matt Scarpuzzi, the creator and owner of Quickstop Fire Sprinkler Tools. These sprinkler tools are in use in close to one thousand fire departments in eight different countries. Thank you to Matt for the generous donation.
