

**BULLETIN**

**NO.:** 20-039  
**DATE:** March 10, 2020  
**TO:** All Personnel  
**FROM:** James Gaboury, Deputy Chief, Logistics  
**SUBJECT:** Highrise Standpipe Kits and 2 1/2" Hose Straps

San Diego Fire-Rescue has purchased Highrise Standpipe kits and 2 1/2" Hose straps. Over the next few weeks, the Logistics' Division will be issuing the Highrise Standpipe kits to all frontline truck companies and four 2 1/2" Hose straps to all frontline engine companies.

The Highrise Standpipe kit includes; one 2 1/2" in-line standpipe pressure gauge, one Pressure Regulating Valve (PRV) Adjustment tool, and one Smooth bore nozzle with stacked tips. The Highrise Standpipe kit should be store in the Captains side transverse compartment (C-5).

Please review reference material located in the San Diego Fire-Rescue Operations Manual Standard Instruction 01, Section 07 High-Rise/Multistory Emergency Response Procedures and Drill Manual, Section II, Chapter 12, Hose, Nozzles & Fittings, pages 11-14 for hose strap deployment. Additional reference material is located on TargetSolutions: San Diego Fire Rescue Department File Center > [San Diego Fire Rescue Department's Files](#) > [Training Division](#) > [Operations Training](#) > TRNG High-Rise. Please contact the Training Division if you have questions regarding the operational deployment of this equipment.

If you have any other questions or concerns please contact Equipment Manager Ernie Valdez at [SDFDEquipmentManager@sandiego.gov](mailto:SDFDEquipmentManager@sandiego.gov) or (858) 573-1351.
