

San Diego Fire-Rescue Department

Probationary Drill Tracker

Name _____

(Print)

The Probationary Drill Tracker has been developed by the Training and Education Division, in coordination with the Post Academy Training Program, to assist probationary firefighters with tracking drills that will be completed during their first year. The drills are based on the curriculum for your probationary year. The document “Monthly Didactic/Administrative Probationary Firefighter Drills” defines the standardized drills that shall be completed while they are assigned to any fire station. This drill tracker will assist probationary firefighters to better define the drills that are needed during probation.

This Drill Tracker serves as a guide to probationary firefighters to assist them during probation and prepare them for their 1-year probationary exam.

At the end of probation, the Probationary Drill Tracker will be turned into the IST/Class Exam Coordinator in the Training and Education Division.

All Company Officers are required to document Probationary Firefighter drills into Target Solutions.
